

3 BUSINESS AREAS = 1 PERFECT SOLUTION

The technology enterprise NETZER GROUP consists of three business divisions. NETZER TGA for technical, neutral planning, NETZER MSR for instrumentation and control engineering, and NETZER RRT for ready-to-use, customized cleanrooms. Customers from the pharmaceutical, electronics, automotive and food industries value the combined knowledge of the NETZER GROUP. This results in cleanrooms that impress with their

efficiency, operational safety, excellence and innovation. Planning is done in 3D-modules. The prefabricated, turnkey modules are top quality, save an enormous amount of time during implementation and ensure that the cleanroom can be assembled during production. The cleanroom goes into operation immediately without any additional interfaces or assembly work. We work together with industry leaders to implement the modules.

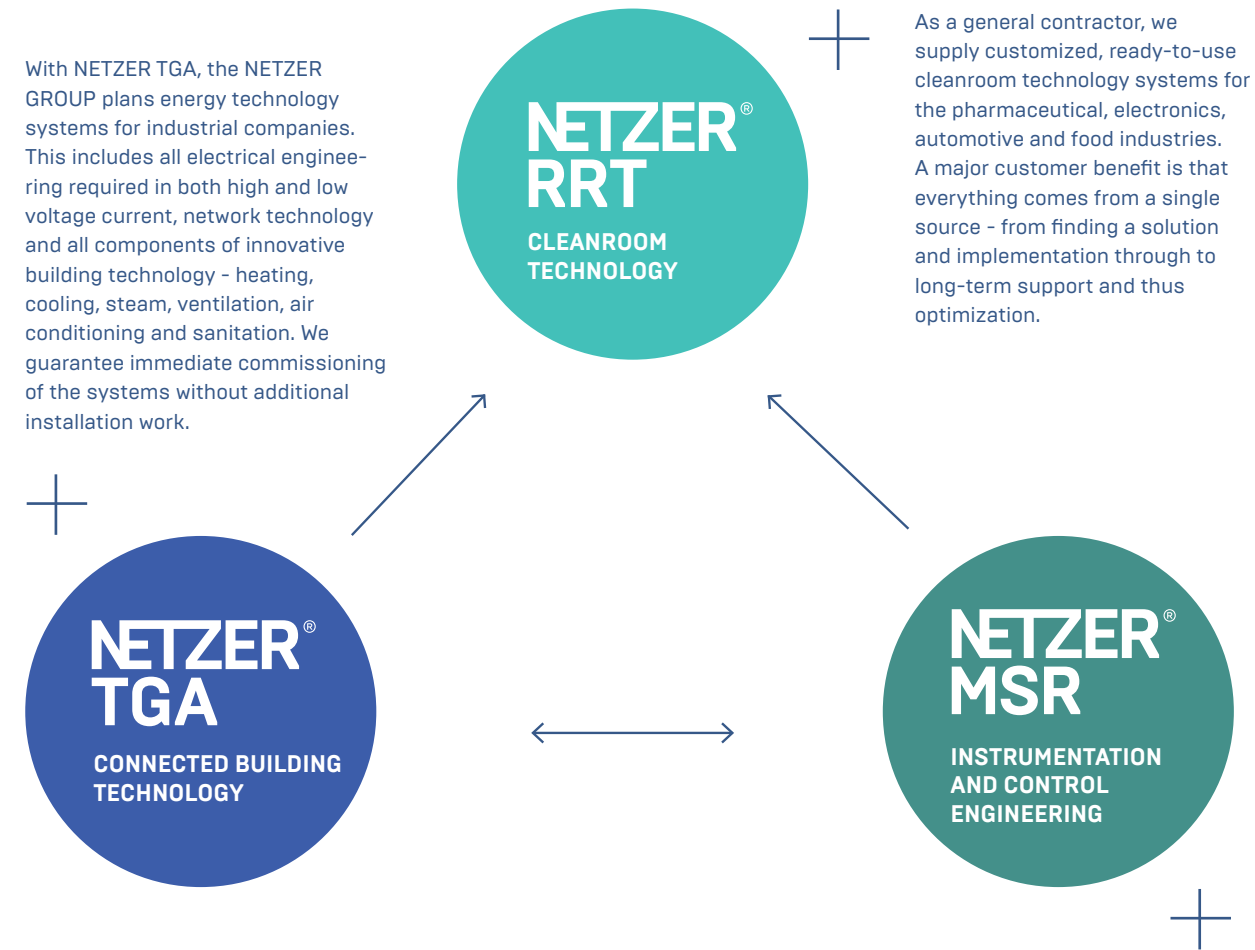

Always different, always new. This means that we handpick the best five suppliers in Europe to find the right products for the respective requirements. This is what we call guaranteed planning neutrality. This means that the customer receives a state-of-the-art system of the highest quality currently feasible. This is how the NETZER GROUP works. This makes us pioneers in technology, processing and operating efficiency.

**IF YOU CARE ABOUT WHAT COMES
OUT OF A CLEANROOM, YOU MOST
CERTAINLY CARE ABOUT WHAT
NEVER GOES INTO IT.**

NETZER MSR develops innovative solutions in automation and system technology for industrial plant and process engineering, as well as for administration. The goal is clear: to continuously optimize systems in order to increase energy efficiency and reliability.

Engineering Pioneers

NETZER GROUP CLEANROOM ENGINEERING

As an experienced general contractor, the NETZER GROUP develops and supplies efficient, customized cleanroom solutions throughout Europe, perfected down to the last detail. Our comprehensive expertise guarantees our customers high quality services and products, absolute safety, precise monitoring and therefore optimum system management. NETZER GROUP Cleanroom Engineering is a pioneer in technology, processing and operational efficiency.

GENERAL CONTRACTOR

The NETZER GROUP knows what digitalization, sustainability and resource conservation look like when it comes to building cleanrooms. Customers from the pharmaceutical, electronics, automotive and aviation industries, as well as food manufacturers in the baked goods and meat processing sectors, value our expertise. Our service as a general contractor begins with the precise planning of the cleanroom in the Building Information Model, plus the qualification and infrastructure to be integrated, and ends with qualification and handover ready for operation.

READY FOR OPERATION

CLEANROOM-ENGINEERING

PARTNERS

We often maintain long-term corporate partnerships. Reliability, adherence to deadlines, a high level of solution expertise and trust-based cooperation pay off, as does the broad knowledge and experience within the NETZER GROUP. This results in innovative cleanroom solutions for complex challenges, completely customized and with maximum customer focus.

MAXIMUM CUSTOMER FOCUS
